NEW  
FORMULA

## POWER ACRYGEL

*Strong and Lightweight*

**INNOVATIVE** formula is perfect for creating strong, lightweight nail coatings. It can be used to strengthen tips, nail forms, and natural nails. This gel functions like acrylic coatings, contains no monomer, and is odorless, which allows you to work at your own pace. Cures in both UV and LED lamps.

Available in 30 ml tubes

SOFT WHITE

**1.** Prep the nail and apply a tip. After filing, cleanse the nail with **Nail Prep**, apply a layer of **Ultrabond** and let dry for 20 seconds.

**2.** Squeeze the tube of gel to release the product and slice off the desired amount with the flat edge of the tool.

**3.** Roll the product onto the nail using the tool.

**4.** Using a high-quality gel brush, dip it into the **POWER SOLUTION** and shape the nail by patting in the same way you would to create an acrylic nail. Continue until the nail and tip are covered and completely smooth. Cure the nail for 30 seconds in an LED lamp, or for 1 minute in a UV lamp.

**5.** You can finish your nails as desired by the client, buffing for a smooth polished finish, and complete with a top gel for a high-shine finish, or apply a coat of GelPolish to create a colored look.
